Wood is a natural product, thus there will be difference in color and wood grain. Wood Flooring will naturally change color after exposure to sunlight and UV lighting; these variations and color changes are apart of all real wood flooring and are not covered by the limited residential and commercial finish warranties. Some of these products are photo sensitive and will change color.

NATURAL CHERRY EXCLUSIVE

NATURAL ASH EXCLUSIVE

NATURAL WALNUT EXCLUSIVE

NATURAL HICKORY EXCLUSIVE

MADE IN AMERICA

Our solid hardwood flooring is a new high performance product. The flooring and finish are designed specifically to address the need for high traffic areas at a competitive price. The product is manufactured in the USA.

GRADE DESCRIPTIONS

Country Home Collections flooring is measured at each step in the production process using computerized statistical process control. Dimensional attributes such as width, wear layer thickness and end-square, as well as grading accuracy and color precision in our stained products, are tightly controlled. All Country Home Collections flooring receives a full-fill, aluminum oxide enhanced finish providing durability and beauty.

EXCLUSIVE GRADE

Natural character and color are permitted. Some filled character marks are permitted in this grade. Exclusive grade is best for use with stains.

TRADITIONAL GRADE

Traditional grade allows natural wood character. Filled voids are smaller and less prevalent. Unlimited sapwood is permitted in the Traditional Grade. This grade is designed to display prominent wood character through a clear finish.

SELECT GRADE

Select grade offers more color uniformity than Traditional and Exclusive Grades. Character marks are smaller and less prevalent. Filled character marks are rare. Sapwood is limited compared to the Exclusive and Traditional grades. The Select Grade balances the elegance and natural character of solid hardwood.

Features & Benefits

- Prefinished hardwood flooring offers a great investment in quality
- 3/4" thick hardwood flooring in random lengths
- **DURABILITY:** A high performance surface material with aluminum oxide protection
- Greater flexibility for remodels or new construction projects
- Can be installed on or above grade levels of your home or office
- Limited 50-year Residential finish warranty
- Limited 5-year light commercial finish warranty

Tower display available upon request.
